

ENVIRONMENTAL POLICY

Policy Statement

Thorite recognizes its responsibility in meeting environmental legislation and the importance of environmental factors in reaching strategic business decisions. We have a commitment to achieving and maintaining high standards of environmental performance through a programme of continuous improvement in our use of raw materials and energy, which will be achieved through:-

- Reducing the impact of our activities on the environment
- Promoting understanding of environmental issues to our employees, customers, suppliers and the local community
- Reviewing and reporting our performance annually
- Maintaining and improving our standards of waste handling by reducing wherever possible our waste through reclamation or recycling processes
- Support for community projects which increase awareness and help to protect the environment

From this policy, objectives and targets are documented and reviewed on a regular basis, considering legal requirements, environmental impact, finance, technology, the business requirements and the views of interested parties.
